Key to icons

Connectivity

No MW required — The device communicates directly with the system because middleware is pre-installed on the device

Ethernet — An Ethernet cable is required to connect this device to the system

Phone modem — The device connects to the system via an internal phone modem

Remote — The device is not fixed to a location and can be used remotely

USB — A USB cable is required to connect this device to the system

Power over Ethernet — An Ethernet cable can be used to both power the device and connect it to the system

Input method

Bar code — Scans a unique bar code to record a punch

Magnetic — Uses a magnetic swipe card to record a punch

Proximity — Uses a proximity badge to record punches

HID — Uses an HID proximity card to record punches

Keypad — Users input a unique code to record a punch

Biometric — Uses a fingerprint or handprint to record a punch

Touchscreen — Features a touchscreen for recording punches and accessing data

UKG InTouch Timeclock

Built for today's modern workforce, the UKG InTouch Timeclock™ delivers an unrivaled user experience that changes the way employees interact with our human capital management solution. The simple touchscreen interface enables employees to clock in and out quickly and easily using a finger, proximity, or badge swipe and provides a fast, self-service view into work-related information, including schedules, time-off requests, and more. Plus, the device's rugged durability and compact, easy-to-mount design make it the ideal time clock for virtually any work environment.

- Large 7" touchscreen with wide VGA, full-color LCD for an unrivaled user experience
- Optional biometric verification for increased payroll accuracy
- Support for all major badge formats
- Easy-to-understand LED indicator for quick acknowledgment of each punch
- Available Wi-Fi connectivity option

Time and attendance terminal for the modern workforce

- Up to 10,000 EE user capacity, depending on biometrics; logging enabled
- Five-level job costing
- Extra pay
- Door relay
- Bell relay
- User validation
- Cost center validation
- In/out prompt
- Views of accruals and schedules
- Time-off requests

Synel Synergy

The Synel Synergy achieves fast matching times while performing complex operations at the clock. This device is a sleek, plastic-encased terminal with four user-programmable function keys plus in/out keys. It can quickly identify each employee by fingerprint, and users can add verification options such as badge or PIN to increase security, which helps reduce buddy punching. The Synel Synergy is also paired with your time and attendance software without the need for middleware, making for an even more seamless experience.

- 3.5" TFT high clear graphic color LCD screen
- Six function keys, 10 alphanumeric keys, and in/out keys
- Durable plastic terminal
- Battery backup for extended three hours of use
- Terminal includes wall mount, Ethernet patch cable, external power adapter, and 4GB micro SD card

Modern, affordable time and attendance terminal

- 9,500 EE user capacity
- Five-level job costing
- Extra pay
- Door relay
- User validation
- In/out prompt

UKG InTouch DX

The UKG InTouch™ DX is an innovative timeclock designed for the future of work. With its sleek design and slim profile, the UKG InTouch DX embraces the best of modern consumer electronics. A large, super-responsive touchscreen and optimized viewing angle ease and speed interactions. Employees can punch in and out faster than ever and navigate to their schedule, time-off requests, and timecard all from one screen. An always-on time and date display and illuminated card reader icons let users get right down to business for a better employee experience. The UKG InTouch DX combines ergonomic features with a rugged, industrial design that stands up to serious abuse in even the toughest work environments. It's amazingly easy to install and service, and it offers an intuitive interface that's simple to learn and use. Plus, the UKG InTouch DX works seamlessly with our HCM solution to help drive accurate timekeeping, collaborative scheduling, regulatory compliance, and real-time access to the latest employee data.

- 7" color wVGA LCD and dedicated, always-on time and date display
- 10/100 Mbps auto-sensing Ethernet with DHCP, https, IPV4, and IPV6 support
- Integrated bar code badge reader
- Magnetic stripe card reader
- HID proximity card reader

Modern, affordable time and attendance terminal

- 10,000 EE user capacity
- All-level job costing
- Extra pay
- User validation
- Cost center validation
- In/out prompt
- Schedule checking
- Views of accruals and schedules

Telephony

The Asher Interactive Voice Response (IVR) system is an alternative to the standard timeclock, allowing employees to communicate labor information and enter time and attendance information using the keypad on a touch-tone telephone or mobile phone. This can be especially beneficial for businesses with off-site employees. It can be as simple as calling in to make an automatic punch, or it can be used as an in-depth, customizable solution that is configured to your specific business processes.

- Specified access to help prevent fraudulent punches
- PIN-based security to eliminate the need for badges
- Multilanguage support
- Customizable call menus for high-performance access to employees even at peak times
- Local or 1-800 numbers available

Telephony/IVR Solution

- 5,000 EE user capacity
- 10-level job costing
- Extra pay
- Outdoor use
- In/out prompt
- Piecework
